

June Bronnert, MHI, RHIA, CCS, CCS-P

As Vice President of Global Clinical Services at IMO Health, June Bronnert is a recognized leader in health information management (HIM), health informatics, clinical terminology, and coding standards with extensive experience spanning healthcare operations, education, and healthcare technology.

In her current role, June provides strategic leadership and subject matter expertise across a broad spectrum of health information and informatics domains, including clinical terminologies, code sets, reimbursement systems, mapping methodologies, and clinical documentation practices. She represents both domestic and international HIM perspectives while cultivating key customer relationships and providing thought leadership through industry presentations, webinars, publications, and educational programs. Throughout her career, June has been dedicated to advancing the integrity, quality, and interoperability of healthcare data.

Prior to joining IMO Health, she held various positions including Professional Practice Director at AHIMA where she provided expertise for national professional practice initiatives focused on clinical coding and data standards. She led development of educational resources, publications, continuing education programs, and industry meetings related to coding, computer-assisted coding, terminology management, data standards, ICD-9-CM, and ICD-10-CM/PCS. Her work involved extensive collaboration with subject matter experts, volunteers, and healthcare leaders across the country.

June's experience also includes positions ranging from Coding professional, Coding Supervisor, and Director at various facilities, including the Department of Veteran's Affairs (VA). She was a member of the National Coding Council at the VA where she provided coding guidance and educational programs nationwide.

June has contributed to the advancement of the HIM profession through academia as an adjunct educator for Cincinnati State RHIT program and University of Cincinnati RHIA program for numerous years while being active in her state (OHIMA), national (AHIMA) and international (IFHIMA) HIM associations. She obtained her master's in health informatics from Northeastern University and her Health Information Management degree from Indiana University.
